

Dear Representative/Senator:

I am writing to you today to voice my grave concern that some vaccines, including all of the Covid-19 vaccines that are currently on the market, are either developed, produced, or tested on cell lines that have been obtained from tissue taken from aborted fetuses.

As many do, I try to live my life in a way that is ethically upright. I have always been taught that one can never do evil so that good may come of it. Thus, I find it ethically unacceptable to allow for the destruction of a human life – even one which may have been ended at the earliest embryonic stages through abortion – so that the good of protecting other humans may follow. It is morally problematic to allow for the benefit of the common good to be purchased at the cost of another human's life.

In determining whether or not I will take the Covid-19 vaccine, I will be considering carefully, and weighing the consequences, of taking a vaccine that I know is morally compromised against that of the dangers presented to my own health and that of others if I refuse the vaccine on moral grounds. It is because of this ethical dilemma that I am faced with that I write to you with *significant protest*, asking you to do everything in your power to encourage vaccine manufacturers to develop, produce, and test vaccines that are ethically acceptable so that I can, with a clear conscience, protect myself and others by vaccinating.

I have written to vaccine manufacturers, asking them to discontinue using fetal cell lines WI-38, MRC-5, HEK-293, RA273 and any other cell lines originally obtained from aborted fetuses; and to not begin new research with any of these stem lines. I've also asked them to provide ethical alternatives for vaccines which do not use fetal cell lines, especially one for Covid-19. I also turn to you for help in pressing these companies to supply ethical vaccines so that those of us who oppose these illicit ones can have a moral alternative so that the common good can be safeguarded against diseases like Covid-19.

Thank you for your time and help on this very important matter.

Sincerely,

Name
